c. Abstract:

The Southeast Florida Regional Travel Characteristics Study (Travel 2000) provided the needed observed travel information for developing planning tools for the three-county region of Southeast Florida. Data collection efforts began in December 1998 and were completed in September 1999. Travel logs were collected for 5,100 households -- all travel by all residents for one day. Approximately 10,000 bus riders were surveyed. Visitors were surveyed at 79 hotels. Trucking information was gathered from 848 commercial establishments using trucks. Workers were surveyed at seven major employment areas in the three counties.

d. Additional Information:

This study is not just a household travel survey – it also includes a transit on-board survey, a visitor's survey (where data was collected at hotels/motels), a trucking survey, and a business survey. These are all rectangularized in the same file under the "hhid" column, which is not representative of the 5,100 households interviewed.

e. Grant/Sponsor Information:

f. Data Information

Type of Data

1. *Qualitative or Quantitative?:* Both
2. *Collection Method:*
   Computer Assisted Telephone Interview (CATI) and Mail
3. *Travel Journal kept?*: Yes

4. *Confidential information?:* None
    a) *Pseudonyms?:* No pseudonyms used
5. *Copyright data?* No

Data Description

1. *Area Studied:* Miami-Dade, Broward, and Palm Beach counties in FL
2. *Group studied:* Households
3. *Universe of Study:*
   Households, trucking, businesses and visitors within study area
4. *Number of Households:* 5,100
5. *Number of Entries:* 33,082
6. *Study Period:* 12/1/1998 - 9/31/1999*
7. *Collection Period:* 12/1/1998 - 9/31/1999
8. *Data:*
   A singular .DAT file. When rectangularized, entries are linked by the "hhid" column value.
9. *Smallest data unit:* Household member
10. *Smallest geo-unit:* TAZ
11. *Sampling Method:* Review documentation
12. *Response Rate:* 90% (when agreeing to the study)
13. *Measure Tool:* N/A
14. *Weights:* Weighted, but method unknown

*Note: the study period is representative of the household study conducted
