c. Abstract:

The Puget Sound Transportation Panel is the first general-purpose travel panel survey in an urban area in the United States. Initiated in 1989 by the Puget Sound Council of Governments (now the Puget Sound Regional Council), it is similar in design and direction to the Dutch National Mobility Panel, but is also descended from the long line of cross-section urban travel surveys in U.S. metropolitan areas and is more focused on the transportation and transit policy issues in U.S. cities. The first wave of the PSTP was conducted in the fall of 1989. It consisted of initial contacts, a telephone interview, and travel diaries completed by members of all panel households.
